503-505 Stevenson Bldg.

Fast direct wire to N. Y. Stock Exchange.

PHONES (Old) 3459. (New) 5. W. S. GIFFORD, Mgr.

SHARES ARE UNSETTLED

MANY FLUCTUATIONS AND IRREGULAR CLOSING QUOTATIONS.

Notable Points of Strength and Weakness—Local Trade Much Benefited by Better Weather Conditions.

At New York yesterday money on call was steady at 2 1/2% per cent.

Prime mercantile paper, 2 1/2% per cent.

Sterling exchange was firm, with actual business in bankers' bills at 4 1/2% for demand and 4 1/4% for sixty days; posted rates, 4 1/2% for demand and 4 1/4% for sixty days, commercial bills, 4 1/4% for demand and 4 1/4% for sixty days.

The New York stock market continued spotty yesterday and largely made up of the operations of the professional traders in individual stocks. Many of these operations were based on causes peculiar to the stocks affected, and the traders professed to be following the leaders in the stock market.

However this may be, it was evident that purely speculative operations played a large part in the dealings, as realizing sales came into evidence in every case where a considerable advance was made, resulting in sharp reactions. There was more or less realizing going on all day, the sustaining influence of the professional traders being availed of to take profits.

The result of this is seen in the general losses here and there, some of them in important stocks. The principal feature of the news was the excellent traffic returns of the railroads, especially in the Southwestern railroads, the bituminous coal carriers and some of the Southern roads, which showed a large increase in their gross earnings. The session of the miners' convention was perhaps the cause of the dullness in the anthracite coal group, although confidence was expressed that no strike was to be feared. The continued low rate for the cash market, however, effect of the depletion of the cash reserves of the banks by reason of the drain to the subtreasury. The heavy decline in cotton exports helps to explain the recent firmness of sterling exchange. A number of important movements were made in the minor railroad companies and rumor was busy with stories of projected consolidations to account for these advances. The Harriman syndicate figured in these rumors as the active agent in many of the alleged combinations. This was true of the Toledo, St. Louis & Western stocks, the common rising 3/4%.

ALL HIGHER BUT WHEAT

CORN CLOSES A FOURTH UP OR BETTER AND OATS AN EIGHTH.

Leading Cereals Decline Three-Eighths—Provisions Dull, but Establish Gains of 5 to 15 Cents.

CHICAGO, March 12.—In the absence of outside support the wheat market closed with a net decline of 5/8 to-day, while the other leading speculative markets held firm, corn closing 1/4% higher, oats 1/8% and provisions 5/16% higher.

Wheat opened 1/4% higher at 75 1/2c to 75 3/4c.

To higher live-livestock support resulted in a higher level of wheat and the mildly bullish government report. There was a fair amount of outside buying in the first few minutes, but the bulk of purchases was made by local shorts. It was soon left to local bulls to take care of the market, and they proved unequal to the task, although the bear pressure was at times severe, or even serious. Considering the divergent views expressed by leading traders the comparative inactivity of the market is a puzzle. The bull arguments embracing recent reductions in crop estimates for Argentina, Australia, France and in the Northwest are answered by pointing to the fact that May wheat is not yet in the hands of the market, and the fact that the government report is not yet in the hands of the market.
